Sir:

REMARKS

This is in response to the Official Action mailed March 24, 2004. A petition and fee for a two month extension of time to file this response is enclosed.

In her office action, the Examiner stated that the application contained inventions that are distinct from each other. More specifically the Examiner asserts that the Claims 1-12 are drawn to a liquid take-up device and Claims 13-18 are drawn to a method for chemical analysis. The Examiner further notes that the apparatus as claimed can be used to practice
